

A LABOUR-MARKET INTELLIGENCE LAYER FOR LMICS

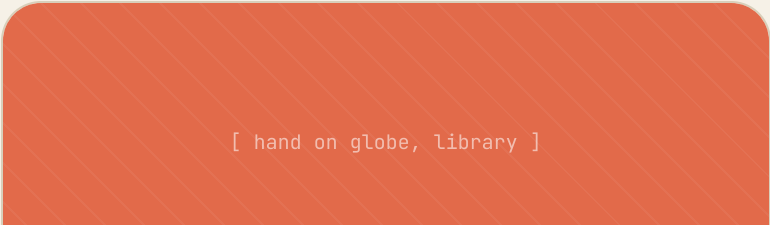

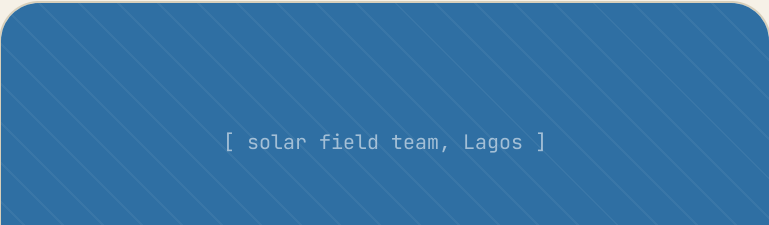

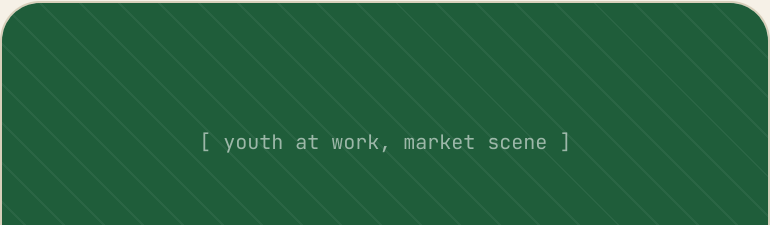

600 million
young people.
Invisible
to the formal
economy.

Their skills exist. Their work history exists. They just don't show up in any database an employer, an NGO or a ministry can search.

Unmapped turns the way a young person tells you about their work into something the formal economy can find.

STEP ONE

Tell us who you are.

In your own words.

Don't worry about job titles or formal language. Tell us what you actually do, the way you'd tell a friend. We'll figure out the labels.

What do you do? What can you do?

"I help my uncle at his electronics stall. I fix mobile phones — screens, batteries, sometimes the small board work. I deal with customers when they come in angry, calm them down, explain what's broken. I keep a notebook of which parts we have. Sometimes I post our shop on WhatsApp."

WHAT WE HEAR, LIVE

● listening

As you write, we map your words to the formal skill vocabulary used by employers and ministries. You'll never see those codes — but they'll see you.
